

5200 QUINTUPLEX

INTEGRATED TRAILER

BIG HORSEPOWER. BIG WATER.

Building on the success and innovation of the Jetstream X-Series units, the 5200 Quintuplex waterblast unit offers high flow capability and premium features on an ergonomic and capable integrated trailer with a low deck height and easy towing. The Quintuplex Series is engineered to outperform other units featuring an all new Jetstream designed, high horsepower quintuplex waterblasting pump on a fully integrated trailer. The 5200Q pump design provides the power and performance so you can attack the toughest challenges, while the advanced technology of the UNx™ Fluid End minimizes downtime and maximizes uptime.

The Quintuplex Series delivers the same benefits you've come to expect from Jetstream -- flexibility, reliability, and durability -- with greater power and productivity to meet the ever-changing demands of the industry.

INCREASED VERSATILITY AND PRODUCTIVITY

- Low center of gravity
- Highest available horsepower in this segment (up to 700hp)
- Lightest trailer in this big water segment (22,000lb GVWR)
- Multiple flow rates for high-capacity applications (25.6 GPM - 136.2 GPM)
- UNx Fluid End Technology with no special tools needed
- Wide range of usable horsepower through 4 speed Eaton Roadranger Transmission
- Designed with feedback from operators in the field

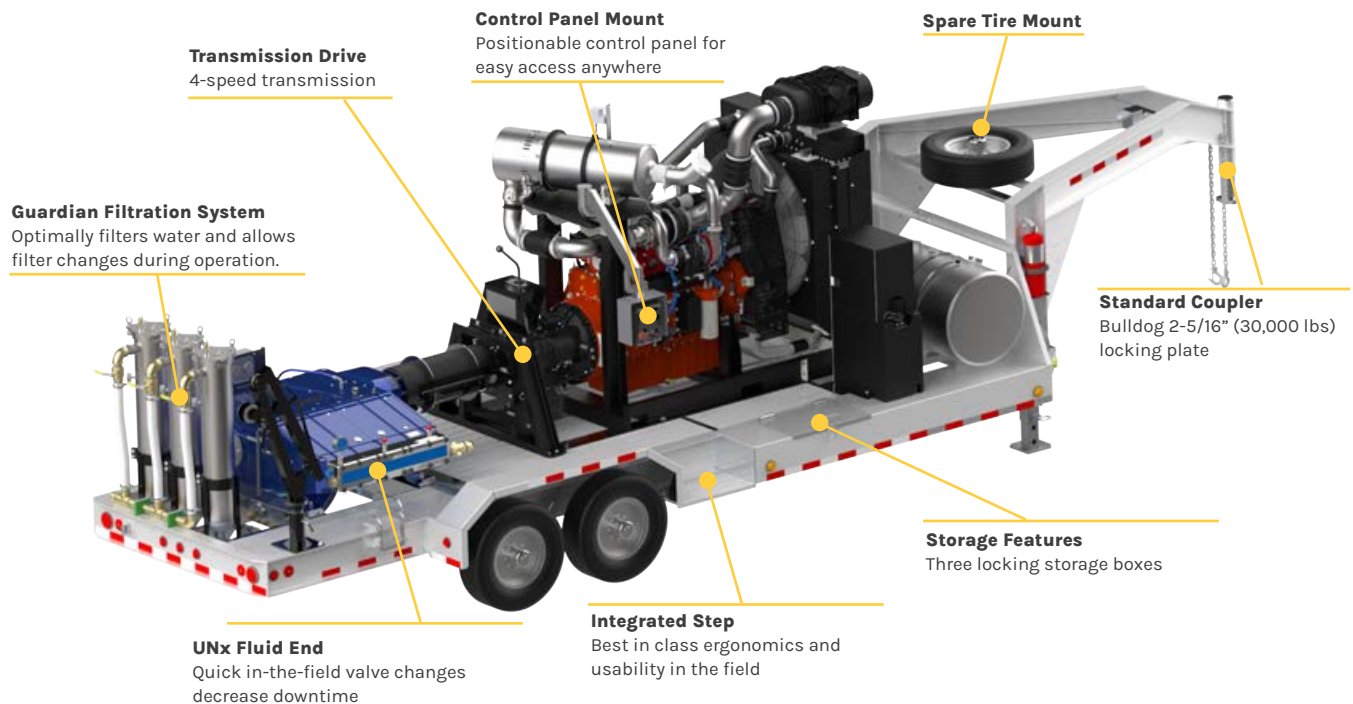

INDUSTRY APPLICATIONS

- Hydro-demolition
- 2D/3D tank and vessel cleaning
- Railcar cleaning
- Surface Preparation
- Tube/line cleaning

INNOVATION THAT GETS YOU MORE

The 5200Q UNx™ Trailer is powered by a diesel engine coupled with a transmission that enables operators to select a wide range of pump outputs to suit any job's flow requirements. Jetstream bareshaft pumps are designed with advanced features that dominate in the field, like fast change packing and swappable fluid ends to convert to different pressure ranges. The UNx™ Fluid End's strength and durability make it the top choice for industrial cleaning challenges. The Guardian filtration system allows the pump to operate continuously without stopping for filter changes, while a pressurized oil system ensures the unit maintains its optimal operational temperature for extended run times.

Industries like chemical, construction and industrial cleaning present unique challenges to water-blasting operators. With a wide range of specialty engineered components and industry-leading features, the Quintuplex delivers superior performance and undeniable reliability in even the most challenging environments. Plus, it's all mounted on a integrated trailer that's easy to tow and simple to maintain.

NEW AND ENHANCED FEATURES:
Reduced deck height provides easier access to pump components while performing routine maintenance. Plus, geared jack stands for more efficient adjustment and leveling and upgraded rigid hard pipe connections.

UNMATCHED VERSATILITY:
The UNx™ Fluid End system simplifies maintenance and allows for fast on-site conversions from 6,800 to 40,000 psi operating pressures, without the need for special tools, equipment, or torque.

MULTI-FUNCTIONAL CAPABILITY:
The Quintuplex unit provides greater in-the-field flexibility and productivity with the ability to operate in three different capacities.

A close-up photograph of a waterblast system. In the foreground, a grey cylindrical tank with several brass fittings and a yellow hose is visible. The hose has red text that reads "SAFETY TEXTILE AIR 300PSI 1/2\"/>

Jetstream has the most comprehensive products, service, rental, and training in the industry. Whether you are looking to purchase or rent water blasting equipment, or if you need service and support for your existing equipment, we've got you covered with the most experienced and customer-focused team in the industry.

In the United States, our products are serviced by FS Solutions. With 13 convenient locations, FS Solutions provides high-performance parts and accessories, Jetstream rentals, repair and rebuild, and safety training services. In Canada, Joe Johnson Equipment (JJE) is there to handle your every need.

Jetstream is a subsidiary of Federal Signal Corporation and has the financial strength, backing, and network of distributors around the world to support any customer.
